# A Place to Grow:

## *Where learning continues beyond the school day*

Our Before & After School Programs offer students enriching opportunities for discovery and exploration before and after the normal school day hours. These programs provide numerous options for fun while also reinforcing the essential lessons and values taught throughout the school day.

## S.O.A.R.

Our Extended Day program allows busy working families the flexibility to drop off before the school day starts and pick up after the normal dismissal time. Our program is organized into five subject areas that are designed to provide your child with opportunities to learn valuable life skills and to reinforce the skills they're learning during the school day, while providing plenty of time for fun with friends.

### **Program Details:**

- Hours: 7:30 am – 5:30 pm
- Before care is complimentary
- Aftercare monthly rates
  - Preschool - PreK: \$364
  - K - 5th: \$333

## Clubs & Enrichment

Our Clubs and Enrichment Programs are great ways for your child to expand on their interests or pursue new passions. These can be added in conjunction with our Extended Day Program or independently. This program offers families an opportunity to enroll their student in one or more days of after school activities without leaving the convenience of our campus. Students must be picked up after their designated club or they will go to aftercare for an additional charge. Please note, there is a ten minute window for pick up. You must pick up during this window or you will be billed for aftercare.

### **Program Details:**

- Clubs start the week of August 24th
- All clubs will end the week of December 7th
- Clubs will not be offered on school holidays/breaks and early dismissal days
- Hours vary by club and enrichment

**Extended Day**

## Student Opportunities for Achievement and Recreation

*Our program is organized into five subject areas that are designed to provide your child with opportunities to learn valuable life skills and to reinforce the skills they're learning during the school day.*

Students explore the exciting world of science, technology, engineering, art and math (STEAM) through building projects, experiments, and design challenges. Sharing ideas, asking questions, and making predictions are encouraged!

Robust outdoor free play and structured games help students learn sportsmanship and develop their physical strength and endurance. Students learn critical thinking and problem solving by participating in board games and team challenges with their peers.

Students express themselves by participating in hands-on visual arts, including photography, videography, drawing, and painting. Students develop planning skills by working on long-term projects with their peers and can participate in group performances or discussions.

Social and emotional growth is nurtured through student and teacher led activities that promote a feeling of community and belonging. Students learn through open-ended activities that give them a chance to apply problem-solving skills and collaborate with friends.

Some students appreciate the chance for independent activities or study after a long day at school. We provide a quiet place to work on homework, read, journal, or seek academic support from peers and teachers. Students can also work on various projects in this small group setting.
